

Remates

Cubiertas y Fachadas

Aplicaciones:

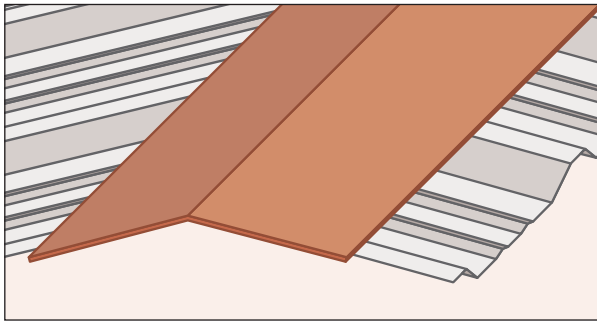

Los remates son los elementos metálicos para conseguir un perfecto acabado en las construcciones. Deformac ofrece las mejores soluciones para los detalles constructivos con una amplia gama de remates estéticos y funcionales. Los remates que se muestran a continuación son meramente orientativos, pudiendo ser adaptados, modificados y personalizados según las necesidades del cliente.

También existe la posibilidad de fabricar remates troquelados con la forma de la chapa consiguiendo una perfecta estanqueidad.
